Nothing like this low price has ever been known before—no farm power unit you can possibly buy will do more for so little—and no farm, regardless of size or location, can afford to be without a Fordson Tractor.

THE Fordson substitutes motors for muscles—substitutes tractor wheels for legs—takes the burden off flesh and blood and puts it on steel.

It allows your energy to be devoted to management, where you have been using it for operation. Save your own time, your own money, your own energy. Our convenient terms plan makes it possible for you to buy now—today.
