GRAY & DAVIS
STARTING-LIGHTING SYSTEM
FOR FORD CARS

LONG ago we realized the demand among Ford owners for electric starting-lighting equipment — provided a system of proved reliability could be obtained at a moderate price.

For nearly two years the Gray & Davis engineers have been engaged in studying the requirements of the Ford car. Exhaustive experiments and months of careful testing were part of the development of this system.

The result is a powerful, dependable starting-lighting device, a typical Gray & Davis system—identical in material and workmanship with systems found on expensive automobiles.

As is well known, Gray & Davis starting-lighting systems are carried as standard equipment on leading American cars in every price class up to $4,000 and over. These systems have been time-tested and time-proved and the equipment we offer Ford owners equals this same high standard.

WHAT THE SYSTEM IS

The system designed for the Ford is very simple, compact, light in weight, and quickly installed on any Model T. Besides the motor-generator, it includes a 6-volt battery, battery box, indicator for dash, regulator-cutout, switches, wiring, and all necessary connections.

The engagement of crankshaft is by silent chains neatly housed, which prevents oil, dust, water, etc., from coming in contact with chains. This also insures quiet running. No parts show in front of radiator.

EASILY INSTALLED

Any garage, machine shop, or owner with mechanical ability, can install the equipment in a few hours. Anyone can operate the system as there is nothing complicated. The system is furnished to the owner complete, ready for immediate installation.
Note compact and simple method of installing. We assure the Ford owner that this system ranks in material, workmanship, and efficiency with Gray & Davis equipment found on highest price cars.

**HOW IT ADDS VALUE TO YOUR FORD CAR**

You can easily imagine the convenience, safety, and intrinsic value which this system adds to the present splendid service of your Ford:

- it starts the engine by pressing a pedal.
- it eliminates the danger of hand-cranking and back-firing.
- by turning a switch the road is flooded with brilliant, dependable electric light.
- it spins the "stalled" engine.
- it serves you steadily, quietly, powerfully — asking less than a half-hour's care each month.
- it brings the convenient use of the car to your wife and daughters.

In these extra services the Gray & Davis system quickly repays its cost.

**Price, $75**

Ready for installation.

The price does not include lamps nor transportation charges. Shipments are made f. o. b. Boston.
